Macnaught Flexiblue® is a high performance grease that is suitable for a wide variety of heavy duty applications. It is highly recommended for use on bearings that are subjected to high temperatures or severe loads. To download technical and sales information on Macnaught Flexiblue®, go to www.macnaught.com.au/flexibluegrease

‘New for Old’ Competition Hits Tasmania!

The Tasmanian leg of the ‘New for Old’ competition was launched early May at Agfest Field Day in Launceston. To date we have received some great entrants so encourage your Tasmanian based customers with superseded Macnaught products to enter for the chance to win an equivalent new model! Denis Dobson is shown here with his K18 Flexigun® purchased in the late seventies and Chris Kirby with his K2 Superlube® purchased prior to 1969, which he says is ‘used so much the paint wore off!’

The Tasmanian leg is valid until 15 June 2008. For more information go to www.macnaught.com.au/taspromo
