

## New Greasing Kits

Macnaught have recently released 3 new kits to suit specific greasing requirements. These kits come in a hard molded carry case to protect and store the accessories and have a coloured sleeve for shelf friendly presentation. The kits are a great and easy way to always have on hand the appropriate accessory. The diagram below shows what is included in each kit.

For more information please contact your Macnaught Territory Manager

### All-Purpose Manual

Right angle coupler. For use in spaces where the area above the nipple is minimal

## QLD 'NEW for OLD' Competition

The QLD leg of the 'New for Old' competition has drawn to a close. Thank you to all who encouraged your customers to enter. We have had an impressive amount of entries with a range of products dating back over 30 years. One of our winners Terry Fritz was very impressed with his K5 Minilube® saying it is 'completely bullet-proof, a product way ahead of its time'.
