

New and Improved MINILUBE®

The trusty K6 MINILUBE® has been re-engineered for even greater reliability. The new and improved heavy duty K7 MINILUBE replaces the K6 MINILUBE. The K7 MINILUBE is robust and has a prolonged product life. The K7 still contains the same great features and specifications seen below:

- Spring loaded system
- 30 shots of grease per prime
- High pressure/High Volume KR gun
- Fully sealed to prevent contamination
- Output: Approx 1.25 g on high volume setting, 0.45 g on high pressure setting
- Allows greasing at up to 69 000 kPa (10,000 psi)
