

Macnaught Continues its Relationship with Dick Johnson Racing

Macnaught is continuing its successful relationship with Dick Johnson Racing in 2009. The partnership began in 2007 with DJR using Macnaught equipment extensively in its workshop and at race meetings. The relationship has developed and for the second year running 'The Team's' two Falcons feature Macnaught's logo on their side mirrors along with Macnaught signage on the race transporters and pit lane garage.

Macnaught is also continuing as DJR's official provider of lubrication equipment, flow meters and hose reels.

Macnaught is proud to be associated with Dick Johnson Racing. Both companies are proudly Australian and have long and successful histories spanning multiple generations.

We would like to wish the Dick Johnson Racing team all the best for the 2009 V8 Supercar Championship and hope to continue the relationship for years to come.

P3-OS2 Grease System

With so many varying sizes of grease containers on the market the P3-OS2 greasing system is the perfect solution. The P3-OS2 adapts to various pail depths and suits containers up to 25 L. This grease system includes the POWERLUBE® grease pump for high pressure; air powered greasing, complete with lid and follower assembly. Also included is the B2 booster gun with 360° ZSB swivel, a pressure gauge, regulator, high pressure hose assembly and a four wheeled container with handle assembly and wheel lock for safe and easy movement.

The P3-OS2 Grease system comes with a 10 year warranty and is fully serviceable.

P3-OS2 List Price: \$1296.90
